

## INSTRUCTIONS TO AUTHORS

### Profiles of Rocky Mountain Geologists Series

Hundreds of geologists have contributed to our understanding of the geology of the Rocky Mountain Region and we hope that through time many of them will continue to be profiled in *Rocky Mountain Geology (RMG)*. Submitted papers must be limited to 7 printed pages (approx. 3100 words) including text, figures, and references. There will be no abstract, but there will be a short list of key words. Only a short, representative list of the subject's books, papers, maps or other appropriate items will be published. These brief profiles should deal with past (i.e., deceased) members of the geologic community, and the fundamental criterion for inclusion is clear evidence of significant contributions to geology/paleontology of the North American western interior. Please consider submitting a profile for this series. Manuscripts will be evaluated by the editors of *RMG*, and an outside review may be solicited.
