

# Mountain Geology

## CONTENTS

	Page	
<i>J. L. Anderson and R. L. Cullers</i>	149–164	Paleo- and Mesoproterozoic granite plutonism of Colorado and Wyoming
<i>P. I. Nabelek, M. Sirbescu, and M. Liu</i>	165–181	Petrogenesis and tectonic context of the Harney Peak Granite, Black Hills, South Dakota
<i>D. K. Holm</i>	183–194	A geodynamic model for Early Proterozoic post-tectonic magma genesis in the southern Trans-Hudson (Black Hills, South Dakota) and Penokean (southern Lake Superior) orogens
<i>R. W. Vasek and A. Kolker</i>	195–222	Virginia Dale intrusion, Colorado and Wyoming: Magma-mixing and hybridization in a Proterozoic composite intrusion
<i>A. G. Thompson and C. G. Barnes</i>	223–243	1.4-Ga peraluminous granites in central New Mexico: Petrology and geochemistry of the Priest pluton
<i>M. A. Barnes, C. R. Rohs, E. Y. Anthony, W. R. Van Schmus, and R. E. Denison</i>	245–262	Isotopic and elemental chemistry of subsurface Precambrian igneous rocks, west Texas and eastern New Mexico
<i>C. G. Barnes, W. M. Shannon, and H. Kargi</i>	263–273	Diverse Mesoproterozoic basaltic magmatism in west Texas
<i>R. C. Roback, B. B. Hunt, and M. A. Helper</i>	275–287	Mesoproterozoic tectonic evolution of the western Llano uplift, central Texas: The story in an outcrop
<i>D. R. Smith, J. Noblett, R. A. Wobus, D. Unruh, and K. R. Chamberlain</i>	289–312	A review of the Pikes Peak batholith, Front Range, central Colorado: A “type example” of A-type granitic magmatism
<i>R. Beane and R. A. Wobus</i>	313–324	Petrogenesis of the Sugarloaf syenite, Pikes Peak batholith, Colorado
